

ARB Adopts Retrofit Verification Procedures – The California Air Resources Board (ARB) on May 16, 2002 adopted, by unanimous vote, its Diesel Emission Control Strategy Verification Procedures (DECSVP). Diesel retrofit technology providers now have in place a procedure for certifying their products, which in turn will facilitate the marketing of both diesel PM and NOx retrofit control strategies. For information regarding the verification procedures, visit ARB's website at: www.arb.ca.gov/regact/dieselrv/dieselrv.htm.
